Research
- Hosting
- All stretch goals.

Timetable
- Obtaining assets (1-day)
- Create Infrastructure and routes (1-day)
- Style (1-day)
- Touch up and test (1-day)
- Hosting (1-day)

Project Page

Navbar

Project one Preview

Project two Preview

- Brief description of project 1.

- Brief description of project 2.

Project three Preview

Project four Preview

- Brief description of project 3.

- Brief description of project 4.

For More visit my Github <Github icon here>

- Project tiles will be clickable links to that projects home.
- Each will contain a preview thumbnail and a brief project description.
- Stretch: Each project will have it's own page on this site explaining in technical detail how the project was made and why certain decisions were made, etc.

- Uses the same Github icon, effects and styling as on profile page.

Article Page

Navbar

Article 1 thumbnail

- Why you would want to read this article.

Article 2 thumbnail

- Why you would want to read this article.

Article 3 thumbnail

- Why you would want to read this article.

- Stretch goal: add articles by simply submitting the link to it like I do on Linked.
- Stretch goal: infinite scroll with async await. (self-hosting might be easier. Both require a back end).

- Most recent articles should be on the top of the page.
